

NASH VectraPaks

NASH VectraPaks - Standardized Solutions

Vectra Feature	Benefits
External mechanical seals	Flexibility and ease of maintenance
Direct drive speeds for 50/60 Hz motors	For worldwide use
Extended pressure ratings	Ability to handle tough applications where backpressure is required
Conical design	Better ability to handle water/particulate slugs and residual gases
One moving part	Long term reliability
Variable port design	High efficiency
Patented gas scavenging	Increased performance at high vacuum levels
Factory performance tested	Trouble free start-up and operation
Backed by 2 year warranty and over 100 years of vacuum and compressed gas experience	Peace of mind

NASH VectraPaks - Direct Drive Dimensions

Options	Once-Through	Recirc.
High vacuum flow controls	X	X
Inlet check valve	X	X
Inlet isolation valve	X	X
External lobe purge	X	X
Mechanical seals (standard or stainless steel)	X	X
Relief valve	X	X
Vacuum gauge	X	X
Flow switch	X	
Partial recirculated seal	X	
Seal line isolation valve	X	
Spray nozzle	X	
Variable speed drive	X	X
Motor enclosures: • ODP • TEFC (standard) • TEFC-SD • Explosion proof	X	X
Motor efficiency: • EISA (standard)	X	X
Motor voltages: • 230/460 (standard) • 575	X	X

NASH VectraPaks - Standardized Solutions

- **Pre-engineered**
- **Quick delivery**
- **Plug & Play**
- **Available in Iron and Stainless Steel**

Simplify your installation with a packaged system from Gardner Denver Nash. Pre-engineered NASH VectraPaks are provided with all of the necessary components assembled and piped. You receive a complete system that is ready to install.

Mounted pumps, once-through and fully recirculated systems are available in various sizes, and in iron or all stainless steel construction.

Vacuum levels to 29" HgV (to 31 mbar abs).

Need higher vacuum? We also offer Oil Sealed packages. Contact us for further details.

	Mounted Pumps	Once-Through Packages	Recirculated Packages
Use When...	...replacing an existing system or where accessories can be reused	...contamination is not a problem and the supply of seal liquid is plentiful	...liquids and gases are hazardous or toxic and where contamination is a concern
Benefits	<ul style="list-style-type: none"> • Lowest initial cost 	<ul style="list-style-type: none"> • Simplicity • Low initial cost 	<ul style="list-style-type: none"> • Low water consumption • Condensable inlet gases may be recovered • Seal liquid contained and isolated from non-hazardous coolant systems
Standard Components	<ul style="list-style-type: none"> • Pump • Base • Flexible coupling • Coupling guard • TEFC motor 	<ul style="list-style-type: none"> • Pump • Base • TEFC motor/drive • Seal water accessories: solenoid valve, flow control valve and strainer • Water trap silencer 	<ul style="list-style-type: none"> • Pump • Base • TEFC motor/drive • Seal water accessories • ASME-coded separator with sight glass • Heat exchanger • Automatic makeup system

Other NASH Products

TC/TCM

Integral 2 stage liquid ring pumps with improved performance at vacuum levels down to 0.8" HgA (27 mbar)
Designed to handle large amounts of liquid carryover without difficulty
Capacity of 100 to 2,240 CFM with vacuum to 0.8" HgA
Capacity of 170 to 3,740 m³/h with vacuum to 27 mbar abs

Steam Jet Ejectors

Sizes range from one-inch (25mm) to 78-inch (2 meters) inlets
Capacities range from 20 to 20,000 CFM
Capacities range from 34 to 34,000 m³/h
Multi-stage system pressures as low as 0.001 mm HgA

2BE4/P2620

Large liquid ring vacuum pumps with superior corrosion resistance
Top discharge capability which eliminates need for trench
Self-recirculating seal water, reducing need for external seal water source
Capacity of 4,000 to 23,000 CFM with vacuum to 24" HgV
Capacity of 6,800 to 39,000 m³/h with vacuum to 200 mbar abs

Service

We have the know-how, the expertise and the specialists. We provide professional service to make your pumps run for decades. Our service centers are located in:

- Australia
- Brazil
- China
- Germany
- Korea
- Netherlands
- Singapore
- South Africa
- Sweden
- UK
- USA

Compressors

Wide range of liquid ring compressors designed for many applications. Rugged and reliable, they can handle highly toxic, explosive and corrosive gases
Specifically developed for applications such as flare-gas, Chlorine and Vinyl Chloride Monomer (VCM) recovery
Capacity of 60 to 2,200 SCFM with pressure to 200 PSIG
Capacity of 100 to 3,740 m³/h with pressure to 15 bar abs
Single and two stage models available
